

Alejandra Lopez

Middle School: Holtville Middle School

High School: Holtville High School

San Diego State University. B.A. in Mathematics with a Spanish minor

University of Southern California. Masters of Arts in Teaching with a Math Teaching credential.

Currently, teaching Pre-Algebra at Frank Wright Middle School in Imperial, CA. During the 2012-2013 school year, I taught high school mathematics in Indio, CA.

MESA: I was part of the MESA program since 8th grade until my Bachelors degree. MESA inspired me to be more involved in Math. I loved math already but seeing the connections between math and science and being able to do hands on projects help me see that Math was the field that I wanted to work on. MESA was that extra support during high school. MESA became my extracurricular activity and it gave me an advisor that supported me and all of my MESA classmates to pursue a college education. The MESA fieldtrips, including visiting universities because of regional competitions allowed me to see what the campus that I wanted to attend was. At the college level, MEP supported me with tutoring and creating my class schedule.
